- Atlassian stack: Bamboo, Jira, BitBucket, Confluence

Who we are?

Scalepoint is a well-established company who has built innovative software solutions since 2000 that make life easier for large insurance companies and the customers they serve. Our core product is a highly advanced cloud based software solution, that digitalizes and automates all aspects of the process that is associated with reporting and procuring a claim and in doing so significantly improves the insurance customer experience. We currently employ 150 people and are growing steadily year by year. The majority of our employees work out of our corporate headquarters in Copenhagen, but we also have employees located in Switzerland, Spain, Poland and Ukraine. For the time being, our customers include 26 primarily large insurance companies. , most of them are from the Nordics, but we also have large customers on key markets in Europe and are working hard to add more.
